

The Berridge Model SS-1421 Portable Roll-Former forms continuous-length, eave-to-ridge straight Berridge High Seam Tee-Panels, and by hand-adjusting the last roll, also forms Curved High Seam Tee-Panel. The Model SS-1421 Portable Roll Former also curves the factory-formed seam caps. Individual factory formed Tee-Clips are used with straight panels and Folding Tee-Clips are used with curved panels. Berridge High Seam Tee-Panel is standard with striations to help minimize waviness, but is also available smooth. Standard seam height is 1-1/2". For a 1" seam height, use 19-3/8" coil. When using a 1" seam height, the following minimum radii apply -- convex: 5', concave: 8'. Refer to www.berridge.com for ASTM & UL Ratings.

COIL & COVERAGE

Coil Size: 20-7/8" (Nominal 21")

Coil Quantity: 115.07 SF per SQ of coverage

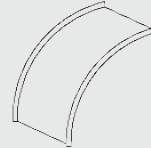

SYSTEM ACCESSORIES (Factory Formed)

Seam Caps: 65.75LF per SQ of coverage

Tee-Clips: 55 clips/SQ (typically at 20" o.c.)

*Folding Tee-Clips: 55 clips/SQ (for curved panels)

MINIMUM CURVING RADIUS (1-1/2" Seam Height)

Convex: 8'

PANEL OPTIONS

Striated (Standard) or Smooth Panel

1-1/2" Seam Height (Standard) or 1" Seam Height
