THE INSIDE STORY

Jack Berridge
Chairman
of the Board

The success story of this young family-owned and operated business is one of hope and inspiration — Sheetmetal Masters has succeeded in building their reputation for integrity and quality architectural metal craftsmanship in just a few short years. The scope and excellent quality of their work demonstrates the potential offered by architectural metal roofing and siding to a new generation of construction companies willing to invest the time and hard work. One specific area where Sheetmetal Masters has been especially successful is the burgeoning roof retrofit program on military bases. Berridge light gauge steel framing and site-formed mechanically-seamed standing seam roof panels have enabled Sheetmetal Masters to successfully complete several very large and technically challenging military base projects both on-time and within value-engineered budget parameters.

Berridge salutes Sheetmetal Masters and the scores of other small but extremely competent Berridge Licensees who represent an important segment of the future of the construction industry.

Jack. A. Berridge
Chairman of the Board

Sheetmetal Masters: Building a Reputation for Excellence and Integrity Through Teamwork

The Sheet Metal Masters, Inc. Management Team: (L-R): Billy Cockrell, President/Owner; Brandy Jewell, Receptionist/File Clerk; Vivian Cockrell, Treasurer/Office Manager.

Sheet Metal Masters, Inc. was founded in 1994 by Billy and Vivian Cockrell and for the past nine and a half years the company has specialized in architectural metal roofing, metal soffit, metal wall panels, metal retrofit and metal structures. Billy and Vivian credit their growth and success to teamwork and safety awareness. Sheet Metal Masters' commitment to safety lead to their being awarded the "Sustained Superior Safety Performance Award" from the Mobile, AL District/South Atlantic Division of the U.S. Army Corps of Engineers for the 4th quarter of 2002. Much of Sheet Metal Masters' work is done on military bases throughout the Florida panhandle region, and their jobsite practices are required to meet high safety and quality standards. The company's growth has come from two

metal Masters, Pensacola, Florida

areas of specialization: Architectural Standing Seam Roofing and Light Gage Metal Retrofit Framing/Roofing. In both of these areas, Sheet Metal Masters' relationship with Berridge Manufacturing Company as a Licensee has provided them with a quality product, supported by technical assistance and material and performance warranty programs: "Since our main goal is to provide the highest quality products, it makes perfect sense to use Berridge products -- for example, Berridge's Vantage Point Retrofit System is the 'Cadillac' of

"Since our main goal is to provide the highest quality products, it makes perfect sense to use Berridge products -- for example, Berridge's Vantage Point Retrofit System is the 'Cadillac' of all Retrofit Systems"

all Retrofit Systems" explains Billy and Vivian Cockrell. Billy and Vivian also credit Berridge's team of professionals in sales, engineering and warranty administration with the necessary assistance to help them become leaders in their market. They specifically note the value of Berridge's assistance with strict Florida Building Codes. Today, Sheet Metal Masters, Inc. has four installation crews with approximately twenty-five employees. Their sheet metal fabrication shop is equipped with a computer-operated Auto Brake, Slitters, High Lift Forklifts and a Berridge Model SP-21X Zee-Lock Portable Roll Former which fabricates the structural double or single-lock Berridge Zee-Lock Standing Seam Roof Panel in continuous lengths.

EGLIN AIR FORCE BASE DORM 19 RENOVATION

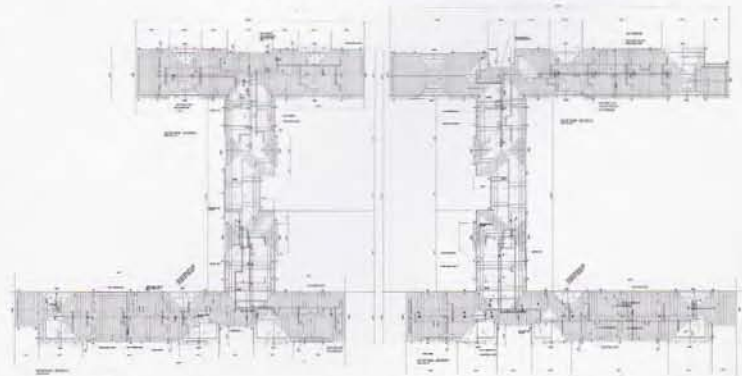

The addition of central air conditioning and water chiller units to the massive dormitory structures at Eglin Air Force Base meant the addition of exposed ductwork and piping systems to the existing flat roofs. The solution was a new sloped standing seam roof structure to provide both aesthetics and weather protection.
