JOHNSON ROOFING

Architect's View

THE WALLACE GROUP

THE INSIDE STORY

Jack Berridge
Chairman of the Board

In 1984, Johnson Roofing, a premier roofing and sheet metal contractor based in Robinson, Texas, purchased one of the first Berridge SS-14 portable rollformers. At the time on-site forming and curving of standing seam metal roof panels was a new concept, but Johnson Roofing saw the potential and opportunity early on. Today, Johnson Roofing's reputation for exceeding customer expectations is due to their expert workmanship, timely service and their pursuit of excellence. Not only dedicated to quality workmanship, Johnson Roofing works tirelessly to enhance the quality of life in communities where its employees live and work.

Since 1976, The Wallace Group has provided quality designs realizing that every structure requires a unique, individualized solution based on the client's needs. Moreover, The Wallace Group has integrated the latest design and drafting technology into daily business operations. As a result, The Wallace Group, a leading engineering and architectural firm in central and north Texas, continues to expand its reputation for first rate designs and customer service.

Standing (L-R): Sherri Johnson, COO; Bill Johnson, CEO, Chairman of the Board; Shawn Johnson, CFO
Sitting: Margaret Johnson, Retired

Johnson Roofing has been a successful family-owned and operated roofing business since its founding in 1941 in Waco, Texas. Jack Johnson and his son Bill would travel to job sites all over Texas with shingle-packed horse trailers in tow while Jack's wife Margaret handled office responsibilities.

Today, Bill Johnson and his daughters Sherri and Shawn manage a streamlined operation located on a 700-acre ranch in Robinson, Texas. The Johnson Roofing "family" has grown to include approximately 250 full-time workers with 60 sheet metal field professionals, 4 sheet metal shop workers, a 10-member sales team, and an office staff of 25. Horse trailers have been replaced by a fleet of installation vehicles. A full-service custom Sheet Metal Department with state-of-the-art roofing and sheet metal equipment including computerized breaks, shears, lifts, and cranes enables Johnson Roofing to adapt to metal roofing's emerging market and new technologies.

Project Managers and Estimators (L-R): Darrell Parker, James Lassetter, Jerry Allen, Kelly Brown, Kevin Sanders, Judge Pineda, Burl Hill, Jim Williams, Joel Baze, Will Coler, Will Smith, Bill Allred, Mike Anderson

In 1984, Johnson Roofing became a Berridge Licensee by purchasing one of the first SS-14 Tee-Panel portable rollforming machines off the line at the Berridge facility. ***“We realized the opportunity and benefits of site-forming continuous, straight, and curved panels and having access to all of Berridge’s products,”*** Sheet Metal Supervisor Joel Baze commented. Presently, Johnson Roofing has installed about 80% of all tapered and curved metal roofing projects in Waco and surrounding areas. Not limited to Texas, Johnson Roofing has installed roofs all over the country and even the Cayman Islands.

Twenty-six years later after purchasing a Berridge SS-14 portable rollformer, Johnson Roofing continues to be at the forefront of the roofing industry, staying ahead of the curve with their green initiatives. Johnson’s workmanship appears on The Waco Chamber of Commerce building, the first LEED Gold certified chamber building in America as well as Dell Children’s Medical Center, the first LEED Platinum rated hospital in the world.

The company’s safety initiatives are equally impressive. In 2009 from a pool of 48,000 companies, Johnson Roofing was awarded a safety award for the second consecutive year by Texas Mutual Company. They were also presented with the Associated General Contractors of America’s Certificate of Recognition for Excellence in Safety Programs the same day.

In addition to metal roofing, Johnson Roofing has full crews for single ply, built up, roof maintenance and repair, foam, coatings, carpentry, siding, decking, insurance claims, gutters and much more. They approach every project with Bill Johnson’s timeless wisdom in mind, “from your grandmother’s back porch to the tallest skyscraper, we do it all.”

The company also maintains strong ties to the local community. Johnson Roofing and its employees participate in community service activities and contribute to local charities, schools, and churches. The company has hosted “Operation Building Bridges”, a festival honoring U.S. troops and their families for their sacrifice and service. Additionally, Johnson Roofing regularly donates Appaloosa Colts, a horse breed characterized by their distinctive spotted-pattern, to benefit various charitable organizations.

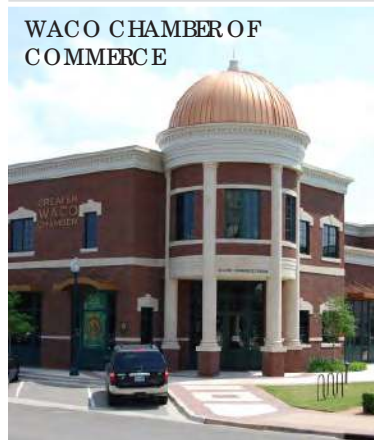

For more than seventy years, Johnson Roofing has succeeded in its pursuit for excellence. The company’s success in the roofing industry is a result of its unique company culture that balances traditional American values and organizational innovation.

Sheet Metal Shop Personnel (L-R): Rich Bower, Ollie Braswell, Kenneth Reneau, Edilberto Espinoza

Bob Wallace, P.E., R.P.L.S., President

"Our clients expect a high quality product, and we specify Berridge with confidence..."

The Design Team:

Established in 1976 as a civil engineering and surveying firm, The Wallace Group has grown into a complete, integrated Engineering/Architectural firm. From offices in Waco, Dallas, Round Rock and Killeen, The Wallace Group operates on the fundamentals that professional service and client satisfaction are the keys to maintaining a successful consulting organization.

An impressive portfolio ranges from engineering projects including water resource facilities, roadways, drainage facilities and utilities, land development, subsurface utility engineering to architectural projects including municipal, financial, religious and educational facilities. Whether it is new construction or adaptive remodeling to an existing structure, The Wallace Group's ability to analyze needs, develop alternative solutions, consider appropriate aesthetics and technology, review budget figures, minimize energy consumption and stay on schedule reinforce the company's reputation for quality and commitment.

"Our clients expect a high quality product, and we specify Berridge with confidence," George Jezek, AIA, Vice-President commented. "We hold Berridge as the quality to look for with their wide-range of architectural products and variety of colors."
