Berridge Curved and/or Tapered Tee-Panel

STANDING SEAM SYSTEM

The Berridge Curved Tee-Panel is an ideal roofing choice for concave, convex or compound curved corners and domed roof construction with solid sheathing. This panel can be curved or tapered on site, allowing for versatility with the added benefit of the exclusive vinyl weatherseal that is a part of the snap-on seam.

Materials
24 Gauge Steel
Limited Availability: 22 Gauge Steel, 0.032 Aluminum

Specifications
Uses: Roof, Fascia*
Coverage: 12 ¾”
Finishes: Smooth
Fasteners: Concealed
Applications: Solid sheathing
Seam: 1” snap-on with extruded vinyl weatherseal

Installation - Curved or Tapered Tee-Panel
(Roofing applications only)
- Tee-Panels and snap-on seams can be curved in continuous length panels on site using the Berridge SS-14 Roll Former
  - Convex at a minimum of 4’
  - Concave at a minimum of 6’
- Straight or curved Tee-Panels can be formed on site with the Berridge SL-14 Roll Former
- Compound Curved Tee-Panels are formed on site with the Berridge SL-1 Roll Former. The SL-1 does not curve panels. Panels must be hand curved over solid decking
- Snap-on seams are curved using the SS-14 Roll Former or the SC (Seam Curver) Roll Former
- Extra snap-on seam caps are factory formed to a maximum of 40’
- Use Seam Sleeve for splicing Tee-Panel snap-on seams
- Entire roof area shall be covered with Berridge approved underlayment
- Use 1” Folding Tee-Clip with Steel panels**
- Use 1” Stainless Folding Tee-Clip with Aluminum panels**

Note:
* Fascia can not be curved or tapered
** Consult Berridge Technical for clip spacing
