The Berridge High Seam Tee-Panel can be curved or tapered giving it strong aesthetic appeal. This panel is a popular choice for a wide range of project types featuring a curved or tapered application that would benefit from the wide 18 ¼” coverage and high seams.

**Materials**
24 and 22 Gauge Steel
0.032 Aluminum

**Specifications**
Uses: Roof, Fascia**
Coverage: 18 ¼”
Finishes: Striated, optional smooth
Fasteners: Concealed
Applications: Solid sheathing
Seam: 1” or 1½” snap-on with extruded vinyl weatherseal

**Installation - Curved or Tapered High Seam Tee-Panel**
(roofing applications only)
- High Seam Tee Panels, straight and curved, are formed on-site using the Berridge SS-1421 Roll Former. Snap-on seams are also curved with the SS-1421 Roll Former
  - 1” Seam: Convex at a minimum of 5’
    Concave at a minimum of 8’
  - 1½” Seam: Convex at a minimum of 8’
    Concave is not available
- Straight Tapered High Seam Tee-Panels can be formed on site with the Berridge SL-24 Roll Former and can not be curved
- High Seam Tee-Panels can not be compound curved
- Extruded vinyl weatherseal is an integral part of snap-on seam cap and prevents siphoning or flooding over seam

- Extra snap-on seam caps are factory formed to a maximum of 40’
- Use Seam Sleeve for splicing snap-on seams
- Entire roof area shall be covered with Berridge approved underlayment
- Use 1” or 1 ½” Folding Tee-Clip with Steel panels*
- Use 1” or 1 ¼” Stainless Steel Folding Tee-Clip with Aluminum panels*

Note:
* Consult Berridge Technical for clip spacing
** Fascia can not be curved or tapered
